To our valued customers and supply chain partners,

We are excited to announce that **Cascon** and our manufacturing partner, **Chamberlain Machine**, have been integrated under common ownership to streamline operations and better serve your business. As you may know, Cascon and Chamberlain have worked closely together for over 35 years to provide custom engineered pumps and related products to customers worldwide. The newly combined organization will build on the enduring success of our long-standing partnership. As part of this process, Cascon Inc has now become Cascon LLC. Chamberlain remains as Chamberlain Machine LLC.

**Our focus hasn't changed.** We will continue to provide the best available engineered pumps and related products, supported by technical and customer service that is second to none.

**Our culture hasn't changed.** The way we work together with our customers and our suppliers remains rooted in the central principle that we always strive to "do the right thing."

This newly integrated, single organization also combines our strengths with outside investment and support from U.S.-based Mangrove Equity Partners. For your business, this means:

- **Expanded capability,**
- **Additional capacity, and**
- **A stronger, more resilient supply chain partner**

We look forward to continued success as we grow together. Please feel free to reach out directly to either of us if you have any questions or concerns.

Best Regards,

Edward H. Gervais III
